BEST PROJECTOR

For bringing the cinema experience into the home, BenQ have created the ultimate solution: the W11000 4K UHD projector. Producing over 8 million pixels at a certified 4K UHD resolution, the W11000 will make you think twice about heading to the movies.

The projector features plenty of technical features to produce perfect pictures, including a THX HD Display

Certification and Rec.709 colour accuracy. Digital Light Processing (DLP) technology that drives most digital cinema projectors ensures the W11000 is long lasting without any loss to picture quality.

Zoom functionality and lens shift also allow for flexible placement in any room. For a blockbuster experience in the comfort of your own home, the winner is... BenQ's W11000 4K UHD projector.
